Summary

Full Stack Developer skilled in website designing, Python backend development, and database management. Experienced in building responsive web applications and developing logic-based systems. Strong understanding of frontend–backend integration with a focus on creating practical, user-friendly solutions.

Work Experience

Dekactus, Social Media Content Planning June 2025 – Nov 2025

- Planned and structured social media content across multiple platforms, maintained content calendars, and contributed to content ideation while coordinating with creative teams to ensure consistent brand communication and effective campaign execution.

Projects

Plan My Trip June 2026

Developed an AI-powered travel planning application that generates personalized trip itineraries based on destination, budget, travel days, and group size. Integrated real-time APIs to recommend tourist attractions, hotels, restaurants, and day-wise travel plans.

Smart Diet Meal Planner Dec 2025

Developed a full-stack AI-powered meal planning application that generates personalized diet plans based on user health goals. Implemented user authentication, meal recommendations, and downloadable diet plans using React.js, Node.js, MongoDB, and Machine Learning.

Attendance Management System Mar 2025

Developed a web-based attendance management system for recording and managing student attendance digitally. Features include secure record management and an easy-to-use faculty interface. Built using HTML, CSS, PHP, and MySQL.
